Reviews

This publication is fantastic. It is one of the most amazing publication i have got study. I am just pleased to explain how this is actually the best pdf i have got read through in my individual lifestyle and could be he finest publication for possibly.

(Mr. Kristoffer Hills)

MATHEMATICAL SYSTEMS THEORY

Book Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of the International Symposium Udine, Italy, June 16-27, 1975 | This volume is the record of lectures delivered at the Conference on Mathematical System Theory during the summer of 1975. The conference was held at the International Centre for Mechanical Sciences in Udine, Italy, and was supported by the Consiglio Nazionale delle Ricerche of Italy and the International Centre for Mechanical Sciences. The aim of the conference was to encourage fruitful and active collaboration between researchers working in the diverse areas of system theory. It was also the hope of the organizers that mathematicians participating in the conference might become interested in the purely mathematical problems being raised by systems theory as a result of their participation. The success of the conference is to be measured by the extent to which these aims were fulfilled. Besides the formal programme of lectures recorded in this volume, many informal seminars were held. The cafes of Udine were often the scene of rich and varied discussions of recent developments in the field amongst the participants of the conference. Last but not least, listening to the ideas exposed in the lectures of others in a creative atmosphere was an important activity. | 1. Automata Theory.- Decomposition Theorems.- 2. Linear Systems Theory.- Algebraic Method for Calculating z-Transform.- The Formal Laplace Transform for Smooth Linear Systems.- On Invariants, Canonical Forms and Moduli for Linear, Constant, Finite Dimensional, Dynamical Systems.- System Invariants under Feedback and Cascade Control.- Linear Difference Systems on Partially Ordered Sets.- Estimation of Optimum Structures and Parameters for Linear Systems.- 3. Bi-Linear and Non-Linear Systems.- Functional Expansions and Higher Order Necessary Conditions in Optimal Control.- Un Outil Algebrique: Les Series Formelles non Commutatives.- A Formal Power Series Approach to Canonical Realization of Bilinear Input-Output Maps.- High...
